

## Genetic Centers in the UK and N. Ireland

The NHS medical genetics services, covering both children and adults, are in two parts:

**Clinical genetics services** - where doctors and genetic counsellors diagnose genetic conditions and/or assess the risk a patient will inherit or develop a genetic condition; and

**Laboratory genetics services** - where scientists undertake a range of genetic and blood tests. Tissue and samples are referred to the laboratory from either clinical genetics services or from other hospital services.

Medical genetics services cover areas of England with populations of between 1 and 5 million people. Services are usually coordinated through a main hospital where the clinical service is based with regular clinics in local hospitals across the service's area.

### THE MIDLANDS

#### [W Midlands Clinical Genetics Service](#)

Clinical Genetics Unit, Birmingham Women's Hospital, Metchley Park Road, Edgbaston BIRMINGHAM B15 2TG Tel: 0121 6272630 Fax: 0121 6272618
