

“My son will now have his dental needs fulfilled for life.”

The ED Society has helped me and my son since shortly after his birth. They have supported me by gaining referrals to dental hospitals and supported me with DLA applications.

Without this knowledge, I would not have known how to achieve such things. My son is now supported by a specialist dental hospital, which will continue his dental needs for life.

When my son started school, I felt so nervous about how to best inform them of his needs, however, the ED society helped with school care plans, and how to ensure the school had as much information as possible regarding his condition.

Whenever I need any help or advice, the ED Society is always there to help in any way they can, and I am forever grateful.
